**Harena Rare Earths Plc**  
**("Harena" or the "Company")**

**AGM Notification and Conference Presentation**

Harena Rare Earths Plc (LSE: HREE) (OTCQB: CRMNF), the rare earths company focused on the Ampasindava ionic clay rare earth project in Madagascar (the "**Ampasindava Project**"), notifies shareholders that its Annual General Meeting ("**AGM**") is being held tomorrow at the offices of Allenby Capital Limited, 5th floor, 5 St. Helen's Place, London, EC3A 6AB at 11:30 a.m. GMT.

Additionally, Harena is pleased to share a recording of its presentation at yesterday's OTC Precious Metals & Critical Minerals Virtual Investor Conference (the "**Conference**").

During the presentation, Harena's Executive Chairman Ivan Murphy outlined:

- Harena's recent positive meetings with officials from the U.S. International Development Finance Corporation ("**DFC**"), the U.S. Department of State, and Madagascar's Ministry of Mines;
- The growth in demand for rare earths from the U.S. and the Company's strategic focus on this market;
- Harena's near-term catalysts, including the submission of its Pre-Feasibility Study ("**PFS**") by the end of the year and the subsequent target for conversion of the mining licence application for the Ampasindava Project;
- The scale of the Ampasindava Project as one of the most significant ionic clay rare earth deposits in the world outside of China; and
- How the use of heap leaching will provide Harena with a sustainable and low-impact solution to extract rare earth minerals at the Ampasindava Project.

### Notes to editors

Harena ([www.harenaresources.com](http://www.harenaresources.com)) is a rare earths exploration and development company focused on the Ampasindava Ionic Clay Rare Earth Project in Madagascar (Harena's interest is 100%). The project hosts one of the largest ionic clay rare earth deposits outside of China, with significant concentrations of high-value magnet metals, specifically heavy rare earths, including neodymium (Nd), dysprosium (Dy), and praseodymium (Pr), which are critical for the composition of neodymium magnets (NdFeB). Harena is committed to low-impact, high recovery mining, providing a sustainable supply of critical minerals for the global energy transition and military defence industries as well as meeting the ever-growing demand for NdFeB from the robotics sector.
